Response to Official Action of May 17, 2005

## IN THE CLAIMS

1-5 (Cancelled)

- 6 (Currently Amended): A method for treating hypertension comprising: administering a composition consisting essentially of:
- (A) an isolated chlorogenic acid, or an ester or salt of an isolated chlorogenic acid; and
- (B) an organic acid having a molecular weight ranging from 60 to 300 or a pharmaceutically acceptable salt thereof,

wherein said organic acid is <u>lactic acid</u> not citric acid.

- 7 (Previously Presented): The method of Claim 6, wherein (A) is a chlorogenic acid.
- 8 (Previously Presented): The method of Claim 6, wherein (A) is an ester of a chlorogenic acid.
- 9 (Previously Presented): The method of Claim 6, wherein (A) is a salt of a chlorogenic acid.

10-18 (Cancelled)

Response to Official Action of May 17, 2005

- 19 (Previously Presented): The method of Claim 6, wherein said isolated chlorogenic acid is a pure stereoisomer.
- 20 (Previously Presented): The method of Claim 6, wherein said isolated chlorogenic acid is a mixture of stereoisomers.
- 21 (Previously Presented): The method of Claim 6, wherein said isolated chlorogenic acid is 4-caffeoylquinic acid.
- 22 (Previously Presented): The method of Claim 6, wherein said isolated chlorogenic acid is 5-caffeoylquinic acid.
  - 23 (Previously Presented): The method of Claim 6, wherein said isolated chlorogenic acid is 3,4-dicaffeoylquinic acid.
- 24 (Previously Presented): The method of Claim 6, wherein said isolated chlorogenic acid is 3,5-dicaffeoylquinic acid.
- 25 (Previously Presented): The method of Claim 6, wherein said isolated chlorogenic acid is 4,5 dicaffeoylquinic acid.
  - 26 (Previously Presented): The method of Claim 6, wherein said isolated chlorogenic

Appl. No.: 09/944,079

Response to Official Action of May 17, 2005

acid is 3-feruloylquinic acid.

27 (Previously Presented): The method of Claim 6, wherein said isolated chlorogenic acid is 4-feruloylquinic acid.

28 (Previously Presented): The method of Claim 6, wherein said isolated chlorogenic acid is 5-feruloylquinic acid.

29 (Previously Presented): The method of Claim 6, wherein said isolated chlorogenic acid is 3-feruloyl-4-caffeoylquinic acid.

30-31 (Cancelled)

32 (Currently Amended): The method of Claim 6, wherein said composition further comprises

A method for treating hypertension comprising:

administering a composition consisting essentially of:

- (A) an isolated chlorogenic acid, or an ester or salt of an isolated chlorogenic acid; and
- (B) an organic acid having a molecular weight ranging from 60 to 300 or a pharmaceutically acceptable salt thereof, wherein said organic acid is lactic acid; and
  - (C) one or more solid food stuffs.

Response to Official Action of May 17, 2005

33. (Currently Amended): The method of Claim 6, wherein said composition further comprises

A method for treating hypertension comprising:

administering a composition consisting essentially of:

- (A) an isolated chlorogenic acid, or an ester or salt of an isolated chlorogenic acid;
- (B) an organic acid having a molecular weight ranging from 60 to 300 or a pharmaceutically acceptable salt thereof, wherein said organic acid is lactic acid; and
- (C) one or more liquid food stuffs.
- 34. (Previously Presented): The method of Claim 6, wherein said composition is in the form of a tablet, granule, grain, pill, powder, capsule, or troche.
- 35 (Currently Amended): The method of Claim 6, comprising administering a composition consisting essentially of:
- (A) 0.001 to 5 wt.% of an isolated chlorogenic acid, or an ester or salt of an isolated chlorogenic acid; and
- (B) 0.0005 to 10 wt.% of an organic acid having a molecular weight ranging from 60 to 300 or a pharmaceutically acceptable salt thereof, wherein said organic acid is <u>lactic acid</u> not citric acid.
- 36 (Currently Amended): The method of Claim 6, comprising administering a composition consisting essentially of:

Appl. No.: 09/944,079 Response to Official Action of May 17, 2005

(A) 0.01 to 1 wt.% of an isolated chlorogenic acid, or an ester or salt of an isolated chlorogenic acid; and

(B) 0.001 to 6 wt.% of an organic acid having a molecular weight ranging from 60 to 300 or a pharmaceutically acceptable salt thereof, wherein said organic acid is <u>lactic acid</u> not eitric acid.
